

Air Tack **J** *Offset Blanket*

Sticky-back blanket for business forms printing using UV inks.

A non-directional blanket designed to be compatible with UV inks. Adheres directly to the cylinder and removes cleanly.

Air Tack **M** *Offset Blanket*

Sticky-back blanket for business forms printing using conventional inks.

A non-directional blanket ideal for general business forms printing using conventional printing inks. It mounts easily and removes cleanly from the cylinder.

Air Tack J *Offset Blanket*

Advantages

- Easily mounts and removes cleanly from the cylinder.
- Specially designed carcass with minimal gauge loss.
- Strict gauge control from blanket to blanket ensures quicker setup, less paper loss and perfect dot reproduction every time.
- Surface rubber is formulated to give quick release.
- Coating techniques require less solvent use in the rubber. This results in pinhole-free surfaces.
- Non-directional blanket.
- Compatible with UV inks.

Typical Physical Properties

	2 Ply
Gauge	0.85 mm
	0.90 mm
	0.95 mm
	1.00 mm
	1.05 mm

Air Tack M *Offset Blanket*
